Solutions For Chromatography

Your Reliable Supplier of Chromatography Vials,Septa,Caps & Syringe filters.

BE SIMPLE, BE PROFESSIONAL

www.alwsci.com

Be Simple, Be Professional

↳ Customize your laboratory solution

As a global supplier of Chromatography Vials, Closures, Septa and Syringe Filters, ALWSCI devotes analytical testing and laboratory consumables to provide high quality, efficient service and favorable price.

Besides, ALWSCI owns 10,000 SQM factory area with 5,000 SQM 100,000 grade cleaning room. To keep stable quality, improve productivity, and avoid any contamination from human interference, ALWSCI has invested in more than 10 automatic production lines presently.

To offer a better solution for sample preparation, full production line is available, including a series of sample vials from 1ML to 2,000ML, Septa from 4mm to 55mm diameter, and Syringe filters made of various membranes.

We would like to draw your attention to Ultra-Clean Septa and EPA Quality Vial Kit. These high quality consumables are mostly used for LC/MS, GC/MS and MS/MS in the environmental, chemical, food and pharmaceutical industries.

We have customers from pharmaceutical, life science, chemistry, technology, food processing industry and so on. Others like Universities, research institutions, government institutions, environmental test institutions, etc.

ALWSCI Group

ALWSCI®

- Analysis: Autosampler Vials & Closures.
- Storage: Sample Vials & Closures.

Labfil®

- Filtration: Syringe Filters, Membranes, and etc.

Why choose us?

- Providing a wide range of Lab consumables.
- Variety OEM/ODM services and short delivery time.
- Rich experience with multinational companies.
- Dimensional accuracy for modern robotic autosamplers.
- Help to collect, identify, organize and protect your samples.
- Class 100,000 grade cleaning room, strict QC and R & D department center.
- With environmentally friendly packaging material.
- Cooperating with famous universities for R&D.
- Superior logistics system to offer door to door services.
- Efficient service and competitive price.

Certificate

ALWSCI has obtained ISO9001:2015, ISO13485:2016, ISO14001, ISO45001 and ISO17025 certificates, and has also set high quality standards for itself and is fully responsible for all customers.

(Please contact our sales department before ordering. We will be happy to determine if we can provide the required certificate for your order.)

More

Further products are available upon request!
Hopefully you will find the introduction of our company not only informative, but also interesting.

We would like to thank you for taking time to visit our website.

- Membrane Filter / 82
- CA/MCE/PES/Nylon/PVDF/PTFE / 83
- Chemical Compatibility / 84

Bonded Closures

ND9 & ND24 Bonded Closures

- Our bonding machines are fully automated to bond liners to caps using a mechanical bond without any adhesives or chemicals.
- No glue contamination.
- No additional assembly.
- Prevent liner fallout.
- Use with different polypropylene caps.
- Available in 1mm-3mm standard thicknesses; customization is available.
- Ideal for medical devices, diagnostics packaging and specialty chemicals.

Blue 9-425 Open Top Ribbed Screw Cap with 9mm Blue PTFE/White Silicone Septa 1mm Thick PRE-SLIT (UltraClean).
Package	100pcs/pk			

Ultra-Clean series

Certified - ND18 Closures

- While your instruments, sample processing, and experimental methods are constantly improving, your chromatography injection vial cap septa cannot be left behind to ensure that the quality of every part of the experimental process (including sample vials and caps) is successful.
- ALWSCI Varefied® vial cap septa undergo a proprietary cleaning process that greatly reduces background particulates and their potential impact on high-sensitivity chromatography experiments.
- At the same time, the packaging with tear-off strips puts you in a good mood for experimentation.

> Certified - ND18 Closures

Package	100pcs/pk		

EPA/TOC Vials & Closures

EPA/TOC Vials & Closures

- If you are doing any sampling, testing, or validation, you need to make sure the results were not skewed by a contaminant that may have come from the container.
- ALWSCI offers a range of certified EPA Screw Vial Convenience Kits which are suitable for all TOC manufacturer's instruments, including Sievers, Shimadzu, OI Analytical, and Teledyne-Tekmar.
- All Certified to contain <10ppb Carbon, giving you confidence in the quality of your TOC measurements.
- Teflon lined caps and protective dust covers.
- Superior vial-to-vial consistency.
- Capped with teflon lined silicone septa and dust cover.
- Widely apply to air, water, soil analysis test, also pesticide residue.

Pre-cleaned and Certified
(TOC<10 ppb)

Parameter analysis		
Analysis	limited	Number of detected
Total organic carbon (TOC)	<10ug/L(10ppb)	<10ug/L(10ppb)

This "Certificate of Conformity" represents ALWSCI's pre-cleaned and certified product that is prepared in accordance with ALWSCI's Performance. Based on standards and meets or exceeds the Total Organic Carbon (TOC) analytical product specifications for each lot number. Analyze are performed under controlled conditions using a calibrated Sievers TOC analyzer to confirm that the identified products and associated batches meet the following acceptance criteria.

40mL Pre-cleaned and Certified		
Ref.No.	C0002296	C0002395
Description	Pre-cleaned and certified (<10 ppb TOC) 40mL 27.5x95mm clear glass vial 24-414 Purple Open Top PP Screw Cap Bonded with 22mm Natural PTFE/White Silicone 3.0mm thick Septa and Dust Cover.	Pre-cleaned and certified (<10 ppb TOC) 40mL 27.5x95mm clear glass vial 24-414 Purple Open Top PP Screw Cap with 22mm Natural PTFE/White Silicone 3.0mm thick Septa and Dust Cover.
Package	Vial + Cap + Septa are pre-assembled together. 72pcs/pk.	

Barcoded Vials

Barcoded Vials

- No more smudges no more smears, Better data for your peers.
- One vial, one code. No duplicate barcodes. You can track every individual vial in system.
- Each barcoded scanned for 100% readability.
- Customized service is workable as request, like 1D, 2D to choose.
- Will not contaminate the samples in anyway.
- The printings on vials are fired on the glass, which makes the printings.
- Can resist all common solutions in laboratories.
- Barcoded vials are annealed at over 500°C, perfect with printing durability and vial inner cleanness.

Barcode Label Templates and Overview

- You only need to provide the barcode content that you want to print on the sample bottle according to your system and tell us whether you want to print a barcode or QR code.

- You need to provide us with the following barcode number, like below:

Sample ID(Barcode Information)
AS20057
AS20057
AS20057

Barcoded 15x45mm 4mL Clear Glass Flat Base 13-425 Screw Thread Vial with QR code on Bottom.
Package	100pcs/pk			

12mL Breath Testing Vial

12ML Breath Testing Vial

- Suitable for various gas detection instruments, and it has good sealing performance and no impurities which can effectively prevent the movement of the cap during the heating and sampling process. At the same time, it is also suitable for various types of breath tests and the preservation of gases to be measured by various breath mass spectrometers.
- Silicone coating gives people a clear instructions without interfering with the analysis.
- The material of vial is borosilicate glass and cap is high-quality polypropylene.
- Cap color can be customized accordingly.

GL45 Safety Caps

GL45 Safety Caps

- ALWSCI laboratory products are designed by ALWSCI to provide exceptional ease of use and reliable protection in the laboratory, saving chromatographers time and rework while supporting excellent chromatography results. Protect your laboratory environment. Security systems provide protection and ensure safer laboratory work.
- ALWSCI Hard Hats are engineered to help you maintain your solvent-free laboratory and feature a special time bar on the air valve to show when the air valve needs to be replaced. Just pull out the old valve and replace it with a new one every six months.
- ALWSCI offers a full range of products to support laboratory safety, including solvent caps for different sized solvent bottles, accessories and more.

Time Strip

The time strip has a lifetime of 6 months and will alert you when to replace the air valve.

How to activate the time strip?

A simple press with the finger on the strip starts the clock for a time of 6 months.

Note: The time strip is a visual reminder. It cannot provide real online information regarding the saturation and contamination of the valve.

Steps in detail:

1. Install the Air Valve at a free port on the Safety Caps and activate the time strip.
2. Guide the solvent tube through the proper fitting on the Safety Caps (std.3.2 mm id) and push the open end through a free port on the Safety Caps.
3. Attach the solvent inlet filter onto the open end of the tubing.
4. Screw the Safety Caps on top of the solvent bottle.
5. Adjust the height of the solvent inlet filter within the bottle.
6. Finally tighten the fitting by turning it clockwise.

Air Valve Working Information

GL45 Safety Cap			
Ref.No.	C0001828	C0001829	C0001830
Description	Black GL45 Safety Cap with 2 ports Including 1x Air Valve and 1 x 1/4"-28 fitting for 1/8" tubing. Safety Caps

Safety Caps

- The Safety Caps can protect your laboratory environment.
- The safety system offers protection and ensures safer work in lab.
- The integrated PTFE layer captures dust and other contaminants from the air.
- The ergonomic design allows an easy and tool free replacement of solvent due to freely rotatable cap-inserts and finger tight fittings that avoid twisted tubes during container exchange.

Purple GL40 Safety Cap with 3 ports Including 1x Air Valve and 2 x 1/4" - 28 fitting for 1/8" tubing.
Package	1set/pk			

GL45 Reagent Bottle

GL45 Reagent Bottle

- ALWSCI GL45 laboratory reagent bottle, made of high-purity transparent boric acid glass 3.3 tube, screw PP cap and PBT material.
- The bottle wall thickness reaches 3.8mm, far exceeding the international level. The product wall thickness uniformity is more consistent, and the wall thickness deviation does not exceed 0.1mm. The bottle body has better air permeability and better aesthetics.
- The Reagent Bottle has high strength, stable chemical properties, and is suitable for long-term storage, transportation and storage of media, biologicals and other liquid solutions for lab, experiment, chemistry, scientific.

Reagent bottles can be used at -198°C to +500°C and pouring rings with screw-on PP caps can be used at +140°C.

Package	1set/pk			

Solvent Waste System

Solvent Waste System

- Using the S60 thread interface, it perfectly matches the conventional waste liquid storage container in the laboratory.
- Equipped with pipeline interfaces of various colors, clearly distinguishing different pipelines.
- Activated carbon can actively adsorb and catalyze the decomposition of toxic and harmful gases to ensure that organic gases are completely adsorbed.
- High-quality materials, high temperature resistance, corrosion resistance, and high cost performance.

Purification Feature:

- The exhaust filter purifies the volatile gases before it is released into the environment. Harmful gas emissions are reduced by 80%.
- Collect HPLC waste safely.
- Suitable for many different containers and hose sizes.
- Protect you from vapors from solvents, acids and alkalis.

GL45 Safety Cap			
Ref.No.	C0002486	C0002487	C0002565
Description	Black GL45 Safety Cap with 5 ports Including 3 x fitting 3.2mm and 1 x Blind Plug and 1 x connection for activated carbon exhaust filter.	Black GL45 Safety Cap with 4 ports Including 2 x fitting 3.2mm and 1 x Blind Plug and 1 x connection for activated carbon exhaust filter.	Black GL45 Safety Cap with 3 ports Including 1 x fitting 3.2mm and 1 x Blind Plug and 1 x connection for activated carbon exhaust filter.
Package	1set/pk		
Solvent Waste System			
Ref.No.	C0002055	C0002056	C0002057
Description	Black S60 Solvent Safety Waste Cap with 2 ports Including 2 x fitting 3.2mm.	Activated Carbon Exhaust Filter.	25L Waste Liquid Storage Container.
Package	1pc/pk	1pc/pk	1pc/ctn

GL80 Reagent Bottle

GL80 Reagent Bottle

- Made of clear laboratory glass bottle molded 3.3 borosilicate.
- Wide mouth reagent bottle uniform thickness, good sealing, glossy surface, stable not mildew, GL80 screw cap.
- For storage and transfer of substances.
- ALWSCI GL80 safety pp cap with 4 ports including 4 x fitting 3.2mm.
- Fully compatible with all the GL80 threads and therefore highly versatile.

Key advantages:

- No evaporation of hazardous gases
- No contamination of solvents
- No crimping of connection tubing
- Easy container exchange
- No air intake (HPLC)
- Cost efficiency (save expensive solvents by avoiding evaporation)

GL80 Reagent Bottle		
Ref.No.	C0002525	C0002526
Description	Blue GL80 Solvent Safety Waste Cap with 4 ports Including 4 x fitting 3.2mm.	1000mL GL80 Clear Laboratory Glass Bottle Molded 3.3 Borosilicate. Blue PP Closed Screw Cap.
Package	1set/pk	

Glass Solvent Filter

Glass Solvent Filter

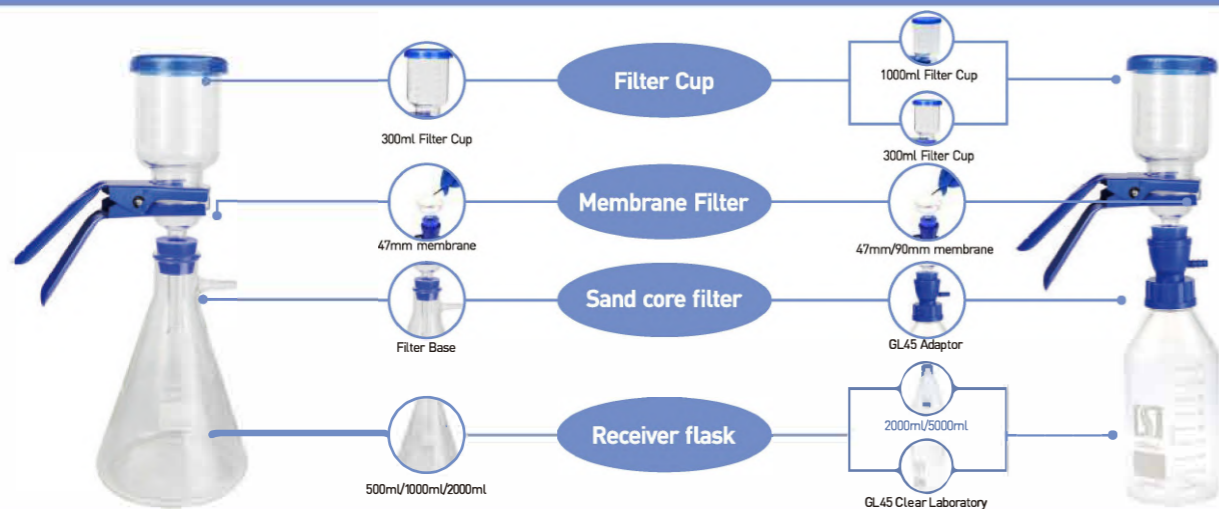

- Glass solvent filter is mainly used in high-performance liquid chromatography flow phase filtration, particulate material analysis and microbial pollution detection, and it is one of the standing equipment in the chemical laboratories.
- Using the glass solvent filter in the process of chromatographic analysis can effectively filter out the impurities that affect the life and detection accuracy of the chromatography column, and play the role of protecting the chromatography column and the chromatograph.
- The plug-type design is adopted to ensure the sealing and also effectively avoid the difficult separation problem of the filter head and the bottle mouth after vacuuming.

Key Features:

- It is widely used almost able to meet all the filtration needs of the laboratory.
- Large effective filtration area, save the cost of filter membrane use, and improve the filtration efficiency.
- Good pressure resistance, which can be used for high temperature and high pressure.
- The fixed clip is made of aluminum alloy treated by the anode process, and will not be damaged by corrosion.
- The bottle is made of high borosilicate glass tubing, which is smooth and transparent, no bubbles and wall thickness uniformity.

96 Well Plates Sampling System

96 Well Plates Sampling System

- This 96 Well Plates Sampling System provides the analyst with 96 completely inert chambers and reduces the risk of cross-contamination from well to well when removing the cover.
- SBS/ANSI standard footprint assures compatibility with all well plates capable prep stations and chromatography autosamplers.
- It offers secure sample containment throughout the analytical sample run.
- We offer two mats, an EVA mat that stabilizes the sample and is pierced by most instruments and a silicone mat that has the resealing qualities of standard autosampler vial septa.

96 Well Plates Sampling System

- Individual glass vials with closures that provide a resistant surface to the organic eluent, thus maintaining sample integrity.
- Prepare and analyze samples in less time with less lab bench space and storage space required per sample.
- ALWSCI has assembled the Glass Insert with 96 well plate, which provide a more convenient way for your chromatography.

Silicone Sealing Mat

- 96 Well Silicone mats are designed for 96-well storage and assay plates.
- Produced from the highest quality research grade silicone to resist coring and tearing, reducing the risk of mat particulate entering the well.
- Usually used in high-throughput applications or those involving accessing the sample through the cover multiple times.

EVA Capmat

- This EVA mat is pierceable and suitable for archiving and ultra-cold storage applications.
- Efficient transport of many samples in a single plate.
- SBS/ANSI standard footprint assures compatibility with all well plates capable prep stations and chromatography autosamplers.

Liquid Scintillation Counting Vials

Liquid Scintillation Counting Vials

- Manufactured from low potassium glass tubing. The uniform wall thickness contributes to excellent counting reproducibility.
- Suitable for use with aggressive reagents and tissue solubilizers.
- Glass material: Made of low extractable borosilicate glass, it has better temperature resistance and can carry out various ultra-high temperature experiments.
- HDPE material: Made from high density polyethylene with lightweight walls for increased counting efficiency, economical choice.
- Select cap and liner material for your application.

> Plastic Vials for PFAS Analysis

- Microvials for an optimized microsampling with 0.3mL, 0.7mL, 0.75mL, 2mL.
- Ideal for Ion Chromatography, Capillary Electrophoresis, Atomic Absorption, pH sensitive samples, sodium, heavy metals analysis and aqueous samples.
- Monitoring the presence of PFAS in the environment and consumer products has become increasingly important.
- Various methods for testing PFAS have been developed, ranging from laboratory analysis to field test kits.
- These methods typically involve advanced analytical techniques such as liquid chromatography and mass spectrometry, which can accurately measure the concentration of PFAS in samples.

Screw Neck ND8

Screw Neck ND8

- Standard opening vials for GC and HPLC, used on instruments of Shimadzu, Varian, Gilson etc.
- To meet your micro sampling needs, ALWSCI has a variety of micro volume inserts with capacities and designs that can transform our vials from full-capacity to limited volume with one simple step.
- Standard opening requires Micro-insert with a diameter of 5mm.
- Micro inserts with flat bottom, conical base, with plastic spring are available.
- The conical design permits complete sample removal.

Screw Neck ND9

Screw Neck ND9

- Wide opening 9-425 vials can be used on all common autosamplers, perfectly compatible with Agilent, Thermo Scientific, Waters, Varian, etc.
- Vials with integrated micro-insert are available in clear and amber glass.
- Wide opening 12x32mm, Polypropylene vials have chemical resistance, which are used for atomic absorption, water and protein analysis, capillary electrophoresis, ion chromatography applications etc.
- PTFE/silicone slit shape choices are Pre-slit, Y-shape, cross-shape available.
- The polymer spring acts as a shock absorber that protects against breakage if the needle bottoms out.
- Vials and closures are available for packing into a kit to reduce the risk of contamination of vials in laboratories.

Crimp Neck ND11

Crimp Neck ND11

- The Crimp Vials are used on instruments of Agilent, PerkinElmer, Varian, etc.
- The wide opening crimp cap provides a larger target area for improved autosampler needle accuracy.
- Vials with integrated Micro-insert are also available in clear and amber glass.
- PTFE/silicone, Natural Rubber/TEF septa, Pre-slit septa to choose.
- The 3-layer septa of Natural Rubber/Red Buty/TEF combines the good physical properties of Natural Rubber(Resealability) with good chemical properties of butyl.(See Customized service page)

Snap Neck ND11

Snap Neck ND11

- The vials are used on instruments of Agilent, CTC, Thermo Scientific, Waters, etc.
- Snap Ring finish eliminates the need for crimping or decapping.
- The integrated Micro-insert are available for in clear and amber glass, micro-inserts can be delivered pre-assembled in vials.
- Snap ring caps are also available in soft material with transparent or blue caps, soft caps are more convenient in handling (push on/off).
- The septa shapes have pre-slit and snow-shape types to choose.

High Recovery Vial

High Recovery Vial

- High recovery vials combine large sample capacities with near full sample extraction.
- Excellent for Compound Storage.
- Smoothly sloped inner conical surface ensures a high level of solid/liquid recovery.

- Manufactured to close tolerances, so enabling use with automated sample handling systems
- Conical well for maximum sample retrieval.
- Reduce product waste by up to 99%.
- Choice of solid top or open top screw caps for direct access with a syringe.
- Volumes from 2mL to 6mL.

COD Test Tube

COD Test Tube

For all analytical procedures from cellular analysis to chemical analysis.

- Made from borosilicate glass tube.
- Screw thread test tubes include PP and PC caps with PTFE/silicone septa.
- Design for COD Analysis, also suitable for instruments and test kits.
- The box is food grade material, environmentally friendly.

- Pre-assembled service is available.

4. SAMPLE VIALS & CLOSURES

- Sample Vials & Closures / 40-41
- ND24 Sample Vials Pre-assembled / 42
- Sample Vial Kit Package / 43
- Glass Bottle & Tamper-Evident Closures / 44-45
- Boston Round Bottle / 46-47
- Wide Mouth Bottle / 48-49
- Soil Sampling Jar / 50
- Volumetric Flask / 51

Sample Vials Application

Industry	End use application
 Diagnostic	Reagents, blood media and testing, urine analysis.
 Analytical	Chromatography, DNA testing, genome sequencing.
 Pharmaceuticals	Human injectable, oral liquid dosage, dry fill, animal health.
 Cosmetics	Perfume sampling, fragrance product launches, point of purchase, cosmetic counter giveaways.
 Gas/ Oil/ Water	Municipal & private water testing, energy-oil industry, hydraulic fracturing (tracking).
 Nutraceuticals	Dietary supplements, herbal medications.
 Other	Penny promotion & marketing tools, Essential oils, liquid potpourri.

Sample Vial & Closures

- Full range of storage vials, both OEM&ODM are available.
- Available in clear and amber glass vials, screw caps with PTFE/silicone septa, PE lined and PE/Alu Foil.
- Extensively in environmental, food, and pharmaceutical applications, suitable for the packaging of various pharmaceutical intermediates, high value-added chemicals, chemical reagents, biological reagents, cosmetics, essences and oils, etc.
- Suitable for long-term storage and transportation of products, has excellent sealing performance.

Tamper-Evident Closures & Glass Bottle

Tamper-Evident Closures & Glass Bottle

- Tamper evidence is vital for a number of industries, which helps consumers identify whether a bottle has been opened or not before purchasing.
- PTFE/PE liners with polypropylene caps have excellent sealing characteristics and good chemical resistance to acids, alcohols, alkalis, aqueous products, and solvents.
- Kind reminder: tamper-evident cap with different color tamper-evident ring creates a easier identification.
- Come and choose ALWSCI tamper-evident bottles & closures, give customers peace of mind that the products they are buying have not been altered after leaving the manufacturer.

Can be used for Serve As

- Environmental lab samples;
- Analyze lab samples;
- Contaminant-intolerant chemicals;
- High value-added chemicals;
- Acids;
- Reagents, and etc.

Boston Round Bottle

Boston Round Bottle

- A classic bottle shape in the packaging industry, the Boston bottle (also known as a Winchester Bottle), can hold almost liquid or solid.
- Traditionally used for pharmaceutical, chemical and laboratory applications, popular uses break the mold and extend across most markets today.
- The clear design makes it easy to identify the contents, and the amber glass bottles provide UV protection for light sensitive components, assisting with keeping your products maintained when storing.

Features:

- Available in clear and amber.
- Sizes: 1/2 oz to 32 oz.
- Strong and heavy bottle.
- Classic Boston Round bottle shape.
- Narrow mouth, ideal for solvents, chemicals and sample storage.

Soil Sampling Jar

Soil Sampling Jar

- The soil sampling jar is mainly used for the sampling and storage of solid soil, sludge or other high-value chemicals. In accordance with EPA method(detection of SVOC or VOC content in water and soil), as well as other methods.
- The cap is made of high-quality polypropylene by injection. Different colors are available, such as black, white and etc.
- The materials of liner are Polyethylene, Teflon or Teflon/Silicone, different materials for different requirements.
- The most important-the performance of sealing is perfect, which ensures that the sample is not contaminated by outside air and other components.

Features:

- The particles will separate into layers: the heaviest particles will sink to the bottom.
- This will be the sand layer, next will be the silt layer, and on top will be the clay particles. Any organic matter in the soil will float to the top of the jar.
- The color of the soil itself will tell you about the organic matter content of your soil.
- Lighter soils have less organic matter and darker soils will warm up faster in the spring.

Volumetric Flask

Volumetric Flask

- A volumetric flask is an essential tool used in many laboratories for accurately measuring and preparing solutions for a wide range of experiments.
- ALWSCI volumetric flasks are available in a variety of sizes, from 5ML to 2000ML.
- They have narrow necks, flat bottoms, and single graduation marks, making them more precise than other types of flasks.
- Volumetric flasks are made of high-quality materials such as borosilicate glass, making them durable and resistant to temperature changes.
- They are a must-have for any scientist or researcher who needs to prepare high-precision solutions.

- One of the advantages of using a volumetric flask is that they are highly accurate. The volumetric flasks are calibrated to measure the exact volume of liquid. This accuracy is particularly important in scientific research.
- Another advantage of using volumetric flasks is their ease of use. They are simple and straightforward to use. They are also easy to clean and maintain, which ensures that they remain in good condition for a long time.

Resistant to strong acids and alkalis

Metal element blank low value

Batch metrology certificate

Flask stopper and mouth have good tightness

5. TOOLS

- GC Septa / 53
- Vial Rack / 53
- Crimper & Decrimper / 53

Tools

Tools

- > GC Septa
 - GC septa are used in gas chromatography (GC).
 - These GC accessories need to introduce the sample without leakage and withstand the high-temperatures of laboratory ovens.
- > Vial Rack
 - Easy handling and transportation of sample vials.
 - Stable standing position because of solid construction.

Welded Syringe Filter

Welded Syringe Filter

- Filtration is achieved by pushing the sample through the membrane with a syringe or other luer-connection device.
- Syringe Filters allow you to control the rate off low, which can be critical with delicate samples.
- It also allows you to filter into nearly any tube, vial, or column that represents the next step in your analysis.
- Filter size: 13mm/25mm/30mm
- Pore size: 0.22um/0.45um

Syringe Filter Selection Guide

- Syringe filters are used for many routine preparation steps in laboratories all over the world.
- They are convenient, ready-to use disposables for removal of particles from solutions and gases.
- Labfil® syringe filters are for a wide range of applications.
- The filters are clean and safe as they are virtually free of leachables and extractables and reliably remove particles and microorganisms without any leakage.
- It is perfect match for the labfil® Luer interface syringe, easy to use, and will not leak to ensure a healthy laboratory environment.

6. WELDED SYRINGE FILTER

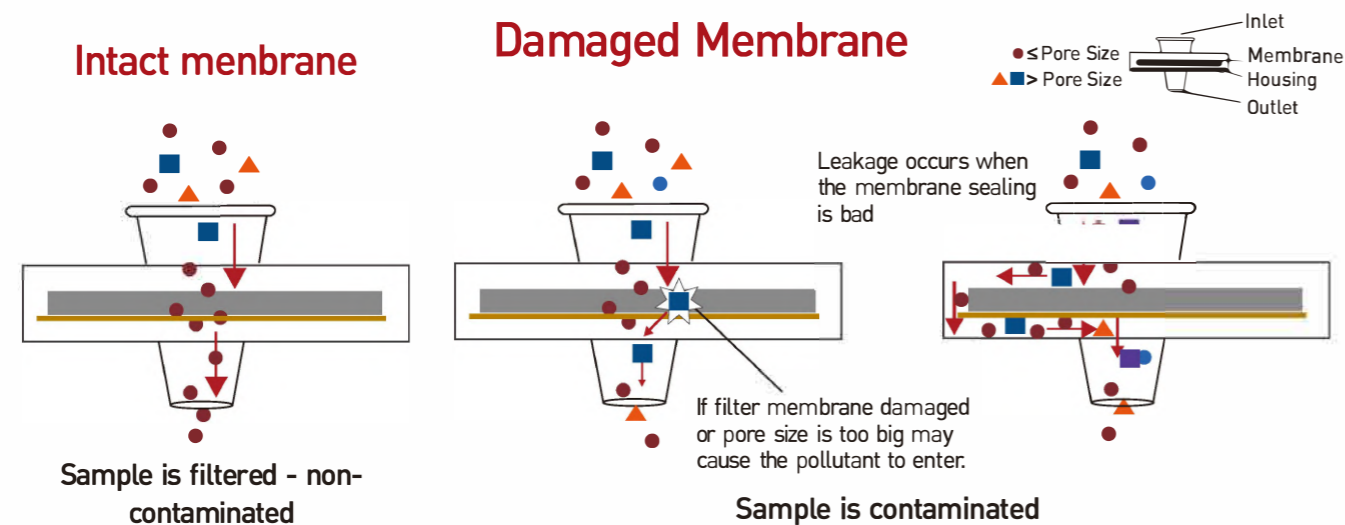

- Nylon / 57
- PTFE / 58-59
- PVDF / 60-61
- CA / 62
- PES / 63
- RC / 64

10 Membrane Filter

Membrane Selection Guide

- Choosing a membrane filter is based on the size and amount of particulate in the sample, the membrane's chemical compatibility with the sample matrix, and potential interactions (binding) between the membranes and the sample components.
 - This table offers general guidelines on membrane characteristics and applications.

Membrane Selection Guide

Membrane Types	Features	Common Uses
Nylon	Good chemical compatibility and very low extractables	General filtration sterilization, HPLC sample prep
Polytetrafluoroethylene (PTFE)	Compatible with strong acids and aggressive solvents	Gas, Air, and Solvent filtration
Polyvinylidene Fluoride (PVDF)	Good flow rate characteristics. Ideal for chromatography applications.	HPLC sample preparation and General filtration

Syringe Filter Diameter	Sample Volume	Pre-Cut Membrane Diameter	Sample Volume
13mm	less or equal 10mL	13mm Pre-Cut Membranes	up to 20mL
25mm	less or equal 100mL	25mm Pre-Cut Membranes	up to 100mL
30mm	less or equal 150mL	47mm Pre-Cut Membranes	multi-liter

Nylon

- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This Nylon+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- One of the most commonly used membranes; broad compatibility with aqueous and organic solvents, with stable hydrophilicity, not suitable for highly acidic samples.

Applications:

- Used for most organic solvents mixtures and mid-polar liquids.
- Chemical filtration and Beverage filtration.
- Note: Nylon binds protein, do not use when high protein recovery is desired.

Typical data

PTFE Hydrophilic

- For removing particulates, reducing signal-to-noise ratios and maintaining flat baselines.
- Filtering aqueous and organic solutions.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PTFE+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Broad chemical compatibility choose for filtering aqueous and organic solutions low protein binding.

Applications:

- Industrial Chromatography.
- Filtration of aqueous solutions as well as organic solvents and chemicals.

PTFE Hydrophobic

- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PTFE+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Hydrophobic PTFE membrane has great temperature resistance.
- Suitable for Solvents/Gases/Acids/Bases.

Applications:

- Degassing/Clarifying aqueous samples.
- Removal of protein precipitates.
- Strong acid solvent filtration and Alkali solvent filtration.
- Biofuel analysis.

PVDF Hydrophilic

- Low protein-binding for filtration of non-aggressive aqueous and mild organic solutions.
- Low UV absorbing extractables and low nonspecific protein binding.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PVDF +PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Hydrophilic membrane with good solvent resistance.

Applications:

- Sterilizing/Clarifying filtration of biological solutions.
- Excellent chemical compatibility, even with aggressive acids and alcohols.
- Filtration of samples where high protein recovery is desired.

Typical data

Material	PVDF Hydrophilic		
Material of housing	PP		
Effective filtration area(cm ²)	13mm/1.13cm ²	25mm/4.15cm ²	30mm/5.2cm ²
Pore size(µm)	0.22/0.45		
Process volume(ml)	<10ml(13mm)	<100ml(25mm)	<150ml(30mm)
Maximum Operating Temperature	100°C		
Maximum Operating Pressure(psi)	87psi

C0000292	25mm	PVDF Hydrophilic Welded Syringe Filter 0.45um with Printing.	100pcs/pk
C0000571	30mm	PVDF Hydrophilic Welded Syringe Filter 0.22um with Printing.	100pcs/pk
C0000396	30mm	PVDF Hydrophilic Welded Syringe Filter 0.45um with Printing.	100pcs/pk

PVDF Hydrophobic

- Filtration of water-soluble oligomers and polymers, e.g. protein solutions.
- Filtration of hydrophobic substances in different organic solvents.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PVDF + PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- This membrane features stability and hydrophobic interactions which is similar to PTFE.

Applications:

- Gas filtration, Vapor filtration, High-temperature filtration.
- Food industry and Medicine filtration.

Typical data

CA

- CA membranes are used for tissue culture media filtration.
- Ideally suited for general filtration and biological/clinical analysis requiring maximum protein recovery.
- High temperature stability can be used with heated liquids.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This CA+PP pre-filter provides two times greater throughput than standard filter without pre-filtration. Naturally hydrophilic membrane filter.
- Low protein binding: great for protein solutions, such as protein isolation pre-filtration.
- Suitable for ground water filtration. Uniform pore size structure.

Applications:

- Filtration of liquid samples and some organic solvents.
- Cell retention and particle retention.
- Light scattering measurement. Sterilization of liquids.

PES

- High flow rates(liquids), low protein binding, low concentrations of extractable substances.
- Low-affinity for proteins and extractable with substantially faster flow rates than PVDF; suitable for pre-filtration and filtration of buffers and culture media.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 30mm.

Features:

- This PES+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Faster flow rate than PVDF.
- Excellent thermal resistance and chemical resistance.

Applications:

- PES is certified for ion chromatography; tissue culture media; filtration of proteins and nucleic acids.
- Suitable for filtration of aqueous solution with high throughput.

- The best option for reliable and leachable free sterilisation of liquids.
- The very low non-specific binding characteristics of this membrane makes it a perfect choice for biomolecule solutions and other dissolved substances.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm.

Features

- This RC+PP pre-filter provides two times greater throughput than standard filter without pre-filtration.
- Outperforming chemical compatibility choose for biomolecule solutions and other dissolved substances.

Applications

- Industrial Chromatography.
- Filtration of aqueous solutions as well as organic solvents and chemicals.

7. COLORFUL SYRINGE FILTER

- Nylon / 67
- PTFE / 68-69
- PVDF / 70-71
- PES / 72
- MCE / 73
- CA / 73

Colorful Syringe Filter

Colorful Syringe Filter

- In order to meet different customers' requests, Labfil® supplies the syringe filters with outer ring as well.
- It's available in many different pore sizes and with several hydrophilic and hydrophobic membrane materials.
- More Economic.
- Reliable removal of microorganisms and particles from liquids for HPLC sample preparation.
- High mechanical and tensile strength.

HOW TO CHOOSE FILTER SIZE

0-10ml
Sample Volume
Use **13mm**
Syringe Filter

10-100ml
Sample Volume
Use **25mm**
Syringe Filter

10-150ml
Sample Volume
Use **33mm**
Syringe Filter

Female Luer
Lock Inlet

Male Luer
Slip Outlet

Unique Threaded Interface Design

MEMBRANE FILTER POLYMER SELECTION

Nylon

PES

PTFE

MCE

PVDF

CA

Nylon	Good chemical compatibility and very low extractables	General filtration/sterilization, HPLC sample prep
PES	High flow rate with good throughput, low protein binding, can be used in high temperature liquids, in inorganic extractable ions.	Ion chromatography certified, tissue culture filtered, and can filter proteins and nucleic acids.
PTFE	Compatible with strong acids and aggressive solvents	Gas, Air, and Solvent filtration
MCE	High flow rate and high throughput. High-protein binding. Excellent biocompatibility.	Used for clarification of aqueous solutions and general laboratory filtration.
PVDF	Good flow rate characteristics. Ideal for chromatography applications	HPLC sample preparation and General filtration
CA	Extra low non-specific binding. High recovery.	Used for aqueous samples containing proteins, or similar large organic molecules biomolecule solution.

Nylon

- High mechanical and tensile strength.
- Universal application for analytical procedures.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 33mm.

Features

- One of the most commonly used membranes.
- Broad compatibility with aqueous and organic solvents, with stable hydrophilicity, not suitable for highly acidic samples.

Applications

- Used for most organic solvents mixtures and mid-polar liquids.
- Chemical filtration and Beverage filtration.
- Note: Nylon binds protein, do not use when high protein recovery is desired.

Typical data

PTFE Hydrophobic

PTFE Hydrophilic

- Hydrophobic PTFE syringe filters have broad chemical compatibility and high pH resistance.
- Versatile filters for use with aggressive organic solvent-based solutions and are especially ideal for HPLC sample preparation.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 33mm .

Features:

- Hydrophobic PTFE membrane has great temperature resistance.
- Suitable for Solvents/Gases/Acids/Bases.
- Excellent chemical compatibility for filtering harsh chemicals that destroy other membrane materials and ideal for aerosol sampling.

Applications:

- Degassing/Clarifying aqueous samples.
- Removal of protein precipitates.
- Strong acid solvent filtration and Alkali solvent filtration.
- Biofuel analysis.

- Hydrophilic materials are obtained through process improvement.
- Hydrophilic material has a great affinity for water and it's easily wetted by water because of the surface with water molecules to form intermolecular focus.
- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 33mm.

Features:

- Broad chemical compatibility choose for filtering aqueous and organic solutions low protein binding.
- Low IC extractables.

Applications:

- Industrial Chromatography.
- Filtration of aqueous solutions as well as organic solvents and chemicals.

PVDF Hydrophobic

PVDF Hydrophilic

- Filtration of water-soluble oligomers and polymers, e.g. protein solutions.
- Filtration of hydrophobic substances in different organic solvents.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 33mm.

Features:

- This membrane features stability and hydrophobic interactions which is similar to PTFE.
- Naturally hydrophobic membrane provides excellent flow rates and high loading.
- Exceptional temperature stability provides extended sampling range over other membranes.

Applications:

- Gas filtration, Vapor filtration, High-temperature filtration.
- Food industry and Medicine filtration.

- Hydrophilic materials are obtained through process improvement.
- Hydrophilic material has a great affinity for water and it's easily wetted by water because of the surface with water molecules to form intermolecular focus.
- Low protein-binding for filtration of non-aggressive aqueous and mild organic solutions.
- Low UV absorbing extractables and low nonspecific protein binding.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 33mm.

Features:

- Hydrophilic membrane with good solvent resistance.
- It has superior performance to prevent leak of sample solvent and can promise membrane area being used in a large filtration area.

Applications:

- Sterilizing/Clarifying filtration of biological solutions.
- Excellent chemical compatibility, even with aggressive acids and alcohols.
- Filtration of samples where high protein recovery is desired.

PES

MCE/CA

- High mechanical and tensile strength.
- Used for most organic solvents and mid-polar liquids.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm and 33mm.

Features:

- Excellent thermal resistance and chemical resistance.
- Having high flow rates thanks to their symmetric structure.
- A low protein adsorption, is recommended for filtration of protein filtration as well as aqueous solutions filtration.
- The low level extractables make them suitable for environmental analysis.

Applications:

- PES is certified by ion chromatography; tissue culture media; filtration of proteins and nucleic acids.
- Suitable for filtration of aqueous solution with high throughput.

- Biologically inert mixtures of cellulose acetate and cellulose nitrate.
- Membranes in analytical and research applications.
- Two types in pore size: 0.22µm and 0.45µm.
- Three types in filter size: 13mm, 25mm.

Features:

- Ideal for capturing and culturing microorganisms in the Water and wastewater industry.
- Used to determine particulate contamination of lubricating oil and hydraulic fluid in patch test kits.
- Compatible with gamma irradiation.

Applications:

- Appropriate for bacterial culturing, including E. coli culturing.
- Biologically inert with good thermal stability.
- Uniform microporous structure results in high flow rates when used for filtering.

Sterile Welded Syringe Filter

Nylon

- 100% integrity tested.
- Individually packaged.
- Ideal for sterile filtration.
- Low extractables, high protein binding; recommended for alcohols and weak solvents.

PES

- For medical use, sterile filtering protein solution, tissue culture media, additives.

C0000518	30mm	Sterile PES Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000519	30mm	Sterile PES Welded Syringe Filter 0.45um with Printing.	50pcs/pk

8. STERILE SYRINGE FILTER

STERILE WELDED SYRINGE FILTER

- Nylon/ 75
- PES/ 75
- PTFE/ 77
- PVDF/ 77

STERILE ECONOMY SYRINGE FILTER

- Nylon/ 78
- PES/ 78
- PTFE/ 79
- PVDF/ 80

Sterile PTFE Welded Syringe Filter

PTFE

- 100% integrity tested.
- Individually packaged.
- Ideal for sterile filtration.
- For degassing/clarifying aqueous and solvent samples.

PTFE Hydrophilic

Ref.No.	Size	Description	Package
C0000488	13mm	Sterile PTFE Hydrophilic Welded Syringe Filter 0.22um with Printing.	100pcs/pk
C0000489	13mm	Sterile PTFE Hydrophilic Welded Syringe Filter 0.45um with Printing.	100pcs/pk
C0000490	25mm	Sterile PTFE Hydrophilic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000491	25mm	Sterile PTFE Hydrophilic Welded Syringe Filter 0.45um with Printing.	50pcs/pk
C0000512	30mm	Sterile PTFE Hydrophilic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000513	30mm	Sterile PTFE Hydrophilic Welded Syringe Filter 0.45um with Printing.	50pcs/pk

PTFE Hydrophobic

Ref.No.	Size	Description	Package
C0000504	13mm	Sterile PTFE Hydrophobic Welded Syringe Filter 0.22um with Printing.	100pcs/pk
C0000505	13mm	Sterile PTFE Hydrophobic Welded Syringe Filter 0.45um with Printing.	100pcs/pk
C0000506	25mm	Sterile PTFE Hydrophobic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000507	25mm	Sterile PTFE Hydrophobic Welded Syringe Filter 0.45um with Printing.	50pcs/pk
C0000520	30mm	Sterile PTFE Hydrophobic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000521	30mm	Sterile PTFE Hydrophobic Welded Syringe Filter 0.45um with Printing.	50pcs/pk

Sterile PVDF Welded Syringe Filter

PVDF

- 100% integrity tested.
- Individually packaged.
- For sterilization/clarification of water, buffers, and salt solutions.

PVDF Hydrophilic

Ref.No.	Size	Description	Package
C0000496	13mm	Sterile PVDF Hydrophilic Welded Syringe Filter 0.22um with Printing.	100pcs/pk
C0000497	13mm	Sterile PVDF Hydrophilic Welded Syringe Filter 0.45um with Printing.	100pcs/pk
C0000498	25mm	Sterile PVDF Hydrophilic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000499	25mm	Sterile PVDF Hydrophilic Welded Syringe Filter 0.45um with Printing.	50pcs/pk
C0000516	30mm	Sterile PVDF Hydrophilic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000517	30mm	Sterile PVDF Hydrophilic Welded Syringe Filter 0.45um with Printing.	50pcs/pk

PVDF Hydrophobic

Ref.No.	Size	Description	Package
C0000492	13mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.22um with Printing.	100pcs/pk
C0000493	13mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.45um with Printing.	100pcs/pk
C0000494	25mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000495	25mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.45um with Printing.	50pcs/pk
C0000514	30mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000515	30mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.45um with Printing.	50pcs/pk

Sterile Colorful Syringe Filter

Nylon

- 100% integrity tested.
- Individually packaged.
- Ideal for sterile filtration.
- Low extractables; high protein binding; recommended for alcohols and weak solvents.

PES

- For medical use, sterile filtering protein solution, tissue culture media, additives.

Sterile Colorful PTFE Syringe Filter

PTFE

- 100% integrity tested.
- Individually packaged.
- Ideal for sterile filtration.
- For degassing/clarifying aqueous and solvent samples.

Nylon

Ref.No.	Size	Description	Package
C0000524	13mm	Sterile Nylon Syringe Filter 0.22um with Outer Ring.	100pcs/pk
C0000525	13mm	Sterile Nylon Syringe Filter 0.45um with Outer Ring.	100pcs/pk
C0000526	25mm	Sterile Nylon Syringe Filter 0.22um with Outer Ring.	50pcs/pk
C0000527	25mm	Sterile Nylon Syringe Filter 0.45um with Outer Ring.	50pcs/pk
C0000548	33mm	Sterile Nylon Syringe Filter 0.22um with Outer Ring.	50pcs/pk
C0000549	33mm	Sterile Nylon Syringe Filter 0.45um with Outer Ring.	50pcs/pk

PES

C0000532	13mm	Sterile PTFE Hydrophobic Syringe Filter 0.22um with Outer Ring.	100pcs/pk
C0000533	13mm	Sterile PTFE Hydrophobic Syringe Filter 0.45um with Outer Ring.	100pcs/pk
C0000534	25mm	Sterile PTFE Hydrophobic Syringe Filter 0.22um with Outer Ring.	50pcs/pk
C0000535	25mm	Sterile PTFE Hydrophobic Syringe Filter 0.45um with Outer Ring.	50pcs/pk
C0000553	33mm	Sterile PTFE Hydrophobic Syringe Filter 0.22um with Outer Ring.	50pcs/pk
C0000552	33mm	Sterile PTFE Hydrophobic Syringe Filter 0.45um with Outer Ring.	50pcs/pk

Sterile Colorful PVDF Syringe Filter

PVDF

- 100% integrity tested.
- Individually packaged.
- For sterilization/clarification of water, buffers, and salt solutions.

PVDF Hydrophilic

Ref.No.	Size	Description	Package
C0000536	13mm	Sterile PVDF Hydrophilic Syringe Filter 0.22um with Outer Ring.	100pcs/pk
C0000537	13mm	Sterile PVDF Hydrophilic Syringe Filter 0.45um with Outer Ring.	100pcs/pk
C0000538	25mm	Sterile PVDF Hydrophilic Syringe Filter 0.22um with Outer Ring.	50pcs/pk
C0000539	25mm	Sterile PVDF Hydrophilic Syringe Filter 0.45um with Outer Ring.	50pcs/pk
C0000554	33mm	Sterile PVDF Hydrophilic Syringe Filter 0.22um with Outer Ring.	50pcs/pk
C0000555	33mm	Sterile PVDF Hydrophilic Syringe Filter 0.45um with Outer Ring.	50pcs/pk

PVDF Hydrophobic

Ref.No.	Size	Description	Package
C0000540	13mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.22um with Printing.	100pcs/pk
C0000541	13mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.45um with Printing.	100pcs/pk
C0000542	25mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000543	25mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.45um with Printing.	50pcs/pk
C0000556	33mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.22um with Printing.	50pcs/pk
C0000557	33mm	Sterile PVDF Hydrophobic Welded Syringe Filter 0.45um with Printing.	50pcs/pk

Laboratory Syringe

Laboratory Syringe

- Made of high quality PP material with good chemical resistance.
- All batches of this product are produced in an ISO 9001 compliant clean environment.
- Additionally, all syringes are designed to match with ALWSCI syringe filters, and they can also be used with ALWSCI vials.

Syringe Filter Usage Guide

Step 1: Transfer Sample

Draw the liquid sample into the syringe, being cautious not to exceed the syringe's maximum volume to prevent overflow or excessive pressure buildup.

Step 2: Filter Sample

Attach the syringe filter to the tip of the syringe. Gently and steadily depress the plunger to pass the sample through the syringe filter. Apply uniform pressure to avoid filter damage or sample ejection.

Step 3: Collect Sample

As the sample is filtered, the filtrate will be collected in a receptacle positioned below the filter unit. Ensure the collection vessel is of adequate size to capture the entire filtered volume.

*Key Considerations:

Verify the compatibility of the filter material with the sample solution prior to filtration. Avoid introducing air into the filter to prevent foaming of the sample or damage to the filter. Once filtration is complete, dispose of the used syringe filter and syringe according to laboratory safety and sanitation protocols.

Ref.No.	Description	Package
C0001749	2mL Disposable HPLC Laboratory syringe.	100pcs/pk
C0001750	5mL Disposable HPLC Laboratory syringe.	100pcs/pk
C0001751	10mL Disposable HPLC Laboratory syringe.	100pcs/pk
C0001752	20mL Disposable HPLC Laboratory syringe.	100pcs/pk

Membrane Filter

Membrane Filter

Membrane Filter

- Membrane filters or "membranes" are polymer films with specific pore ratings.
- Membranes retain particles and microorganisms that exceed their pore ratings by acting as a physical barrier and capturing such particles on the surface of the membrane.
- Labfil® membranes are available in a variety of polymers, pore sizes, diameters, and surface types.
- Biologically inert mixtures of cellulose acetate and cellulose nitrate have made sterile MCE membrane filters one of the most widely used membranes in analytical and research applications.

- Membrane filters or "membranes" are polymer films with specific pore ratings.
- Membranes retain particles and microorganisms that exceed their pore ratings by acting as a physical barrier and capturing such particles on the surface of the membrane.
- Labfil membranes are available in a variety of polymers, pore sizes, diameters, and surface types.

Features:

- Ideal for capturing and culturing microorganisms in the Water and wastewater industry.
- Used to determine particulate contamination of lubricating oil and hydraulic fluid in patch test kits.
- Available in pore sizes 0.22µm and 0.45µm, colored black, with a gridded surface.
- Compatible with gamma irradiation.

Selection Guide

Better Your Chromatography Consumables.

ALWSCI Main Products:

- Analysis: Autosampler Vials & Closures.
- Storage: Sample Vials & Closures.

Selection Guide:

- Proper septa selection is critical to prevent contamination and avoid damage to the needle and instrument.
- The right choice of septa depends on the application.
- For highly sensitive samples, we recommend PTFE-lined Silicone septa, because the PTFE layer has good chemical resistance.
- Besides, septa made of different materials have different safety temperature resistance.

► Septa Selection Guide

Materials	Safety Temperature
PTFE/Silicone	180°C
PTFE/Silicone/PTFE	200°C
Red Rubber/PTFE	-40°C to 110°C
Natural Rubber/TEF Butyl/PTFE	-40°C to 120°C
PE	-20°C to 80°C

► Cap Selection Guide

Materials	Safety Temperature
PP Cap	-20°C to 100°C
Aluminum Cap	-60°C to 300°C
Phenolic Cap	-20°C to 140°C
PC Cap	-50°C to 160°C
